TECHNICAL

Requirements:

- Atari® XL/XE series (64K) and other compatible systems
- Disk Drive or a compatible device (e.g. SIO2SD)
- Joystick

This game is emulator-compatible and has been tested in:

Altirra 3.10 and Atari800Win PLUS v4.0

Also Tested on real hardware (Atari 800XL + SIO2SD)

Because the game is licensed free of charge, there is no warranty for the game, it is distributed „AS IS“. You use at your own risk.

GAMEPLAY

WASTELAND is an arcade game settled in a ruined, direful city.
Sometime in the future...

You are the sole survivor, alone in a post-apocalyptic world...
Everyone else ran away. Except you...

The only way to get out is to use the escape pod
but it relies on fuel pellets for its power.
It is your mission to collect the fuel pellets,
power on the escape pod and to leave the hostile world.

Watch out for the killer robots, deadly drones and nuclear waste...
